

Position:	Quality Manager	# of Positions:	1
Department:		FLSA:	Exempt
Reports To:	Corporate Quality Manager	SG:	Choose an item.
Location:	Shreveport, LA		
Posting Date:	Monday, July 27, 2015 through Friday, July 31, 2015		

PURPOSE AND ROLE:

Responsible for quality testing of raw materials, in-process materials and bulk or finished products to ensure conformity to specifications in a manufacturing environment.

JOB DUTIES AND RESPONSIBILITIES:

- Manage all local Quality Control programs, processes and activities, ensuring products have been manufactured according to specifications.
- Review, recommend and effectively implement Quality initiatives that further support local operations and meet corporate objectives.
- Responsible for management of all local corrective actions and solutions.
- Supervise Plant personnel with quality related responsibilities. This may include managing Quality Control Team Members who check, test and inspect raw materials, goods in process and finished goods.
- Prepare activity and progress reports to identify and resolve recurring problems, either with the quality of product or the reliability of testing procedures.
- Partner with corporate ISO, quality, HSE and other individuals to effectively promote a quality culture consistent with the entire organization.
- Partner with Plant Manager to proactively identify Quality issues.
- Handles initial response to all emergencies as part of Plant management team.
- Maintains plant security as part of Plant management team.
- Activates emergency response plan as part of Plant management team.

REQUIREMENTS:

- Bachelor's degree required
- Valid Driver's license required.
- Minimum ten years' experience in Quality, Compliance or directly related role in a manufacturing environment.
- Minimum five years in supervisory or management role.

EXPERIENCE & SKILLS:

- Minimum ten years' experience in Quality, Compliance or directly related role in a manufacturing environment.
- Minimum five years in supervisory or management role.
